

STREET-LEVEL ALGORITHMS

Street-level algorithms can create and act on decision boundaries like street-level bureaucrats.

But they can't reflect on new circumstances, and update their decision boundaries, like people can.

STREET-LEVEL ALGORITHMS

Street-level algorithms can create and act on decision boundaries like street-level bureaucrats.

But they can't reflect on new circumstances, and update their decision boundaries, like people can.

Let's pause

Any questions to clarify at this point?
