There's too much stuff going on to talk about everything

Let's talk about what KINDS of things can come up

Let's talk about what kinds of things can come up

and how to work through them

- Ethical considerations in data collection
- Ethical considerations in uses of data
- Frameworks for thinking about this stuff (beta?)

Risks involved in data collection

- Surveillance
- Informed consent
- Coercion

Risks in downstream uses

- Re-contextualizing data
- Reading more out of data than you should
- Allocative harms
- Representational harms
